Many actively seek human contact. It is a place where animals certainly outnumber people!

To enter one of the five beautiful crafted pole Tree Houses perched amongst spectacular rainforest on the banks of a river is to go from wilderness to 4 Star Luxury.

Large comfortable lounges, a cool climate in summer, woodfires in winter, private undercover parking, your own washing machine and dryer, IDD telephone, internet jack and television - all combine to provide feelings of relaxed comfort.

This rare river-flat rainforest, is privately owned, and is unique, with over 2km of vegetated river as its boundary. Less than 10% of rainforest in North Queensland has survived since European settlement, and most is inaccessible.

No mosquitoes, flies or crocodiles - providing a very comfortable environment to live in.

Fur 'n' Feathers Rainforest Tree Houses offer accommodation with a perfect balance of luxury, wilderness and privacy.

Situated only 90 minutes from Cairns in North Queensland, on the Cairns Highlands, and central to all Atherton Tableland attractions.

This 100 acre private wildlife sanctuary with eco-tourism advanced accreditation, offers guests a unique rainforest experience 2,500 ft above sea level, on the Atherton Tableland.

This ancient rare rainforest, with its peaceful river, has never been cleared of its lush vegetation. It is home to a fantastic array of Australian wildlife including cassowaries, wallabies, tree kangaroos, tree frogs, platypus, possums and of course beautiful birds. It is unfenced, and the animals and birds choose to live here.
